## Pollution Project: Reflection Notes

As you read the wiki pages created by the South African students, consider the following:

What type of pollution did the South African students discover? How does the pollution affect the wildlife there? What do you think of the solutions to pollution that the students propose? Think about at least two ways that the South African students' findings relate to what you discovered in the Inner Harbor. What do you think about the global nature of pollution as a problem? What would you do to prevent pollution from harming wildlife, at home and around the world?

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.
